

BlackFin HEMP™

FOR MEDIUM TO LARGE DOGS

By **1:20 VET™**

Why BlackFin HEMP™?

BlackFin HEMP™ offers a groundbreaking **Liquid Structure®** nano-domain technology that provides a significantly smaller and more stable delivery mechanism to ensure that **10x more CBD** reaches the bloodstream.

BlackFin HEMP™ positively effects the following areas of concern:

- Behavior
- Ocular Discomfort
- Immunity
- Joint Mobility
- Digestion
- Neurological Health & Cognitive Function
- Aging

“BlackFin HEMP™ has impressed me with its properties supporting ocular discomfort! I am integrating it into discomfort control for various conditions.”

- C. Colitz, DVM, PhD, DACVO, MBA

Softgels for medium/large dogs

BlackFin HEMP™ is clinically researched and trusted by **Johanna Meji-Fava, DVM, PhD**, (marine mammal ophthalmology), a holistic marine and zoo veterinary consultant to facilities in over 90 countries around the world.

Buy One, Give One

In support of our veterinary colleagues at zoo and aquarium facilities around the world, 1:20 Vet™ is donating one unit of BlackFin HEMP™ for each unit sold for a companion animal.

What makes BlackFin HEMP™ uniquely superior?

BlackFin HEMP™ provides a much smaller and more stable delivery mechanism for better utilization of the hemp molecules. Hemp-extracts commonly use a micelle or liposome delivery system, but this method is unstable in the harsh acidic environment of the stomach and has limited extract absorption because of its large molecular size, rendering it a less effective hemp product.

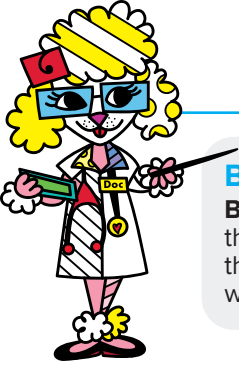

Nano-domain technology is about 1/2000 the width of a human hair and when compared to typical delivery methods, BFH ensures that **10x more** hemp extract reaches the bloodstream.

First HEMP supplement to be studied and published in zoo medicine species, including the first dolphin in the world to be on a continual hemp protocol.

For more information visit us at BlackFinHEMP.com or call 800-721-1310

BRITTO Partnership

BlackFin HEMP™ and 1:20 Vet™ have exclusively collaborated with world-renowned artist ROMERO BRITTO to provide this high quality hemp supplement educating our community on zoo and wildlife health care and conservation through “Poodle Doc”. Poodle Doc, inspired by **Animal Necessity®** mascots KeyKey and Jilly, will provide consumers with valuable information on **BlackFin HEMP™** and the importance of supporting our zoos and aquariums.

All Animals Have an Endocannabinoid System

Anandamide, known as the “bliss/happy” molecule, promotes the neurotransmitters serotonin and GABA, to provide a calming effect and digestive and neurological support. Anandamide also helps support a normal inflammatory response and regulate the immune response through CB2 receptor interactions.

A primary mechanism of CBD is the reuptake inhibition of anandamide. Anandamide is chaperoned away from the synapse by a fatty acid binding protein (FABP) and broken down by fatty acid amide hydrolase (FAAH). CBD interrupts this process by preferentially binding to FABPs for a long period of time, inhibiting the intracellular degradation of anandamide by FAAH.

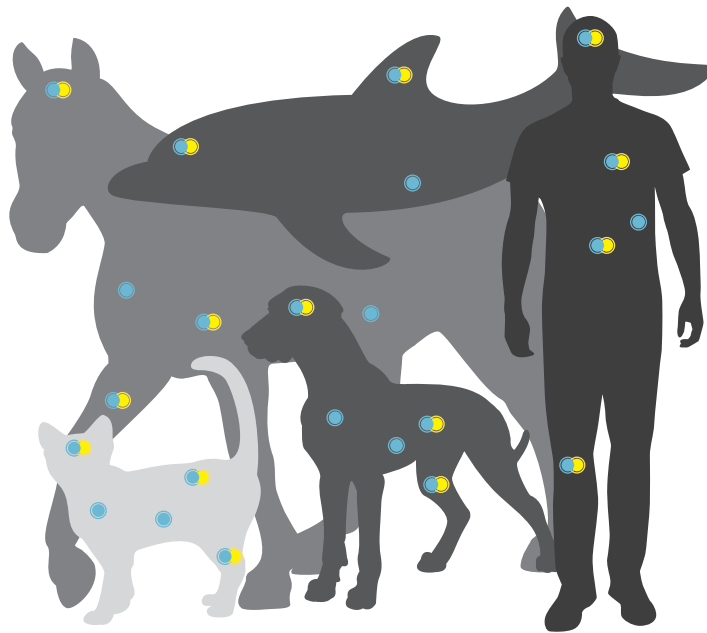

Bottom line: More anandamide means more happiness and homeostasis.

CB1 receptors are primarily found in the brain and central nervous system, and to a lesser extent, in other tissues.

CB2 receptors are mostly in the peripheral organs, especially cells associated with the immune system

Benefits

Eyes

Maintains and supports the normal inflammatory response of the eye

Brain

May reduce hyperactivity and promote relaxation

Bones/Muscles

Enhances function of the muscles, joints, and connective tissue

Immune System

Helps maintain normal inflammatory cytokine cascade

Heart/Vascular

Helps support cardiovascular function, vascular health, and circulation

Gastrointestinal/ Hepatic System

Promotes gastrointestinal and hepatic health and function, and helps maintain a normal appetite

PRODUCT FACTS

Active Ingredient	Amount Per Administration Unit
Hemp Extract	25 mg

Gelcap Inactive Ingredients: Ethanol, Medium chain triglycerides, Polyoxyethylene sorbitan monooleate, Vegetable oil, Softgel (Gelatin, Glycerin, Purified Water)

SUGGESTED USE

Weight (lbs.)	Daily Use
30-60	Week 1 and Week 2: 1 Softgel Daily Week 3+: 1 Softgel Every Other Day
61-80	Week 1 and Week 2: 1 Softgel AM, 1 Softgel PM Week 3+: 1 Softgel AM
80+	Week 1 and Week 2: 2 Softgels AM, 1 Softgel PM Week 3+: 1 Softgel AM, 1 Softgel PM

1:20 VET™ is brought to you by ANIMAL NECESSITY®

Animal Necessity® provides a family of superior quality supplements, with unique formulations driven by science.

Our Scientific Advisory Team includes over 100 years experience in veterinary medicine, including 60 years in board certified veterinary ophthalmology, pharmacology, and orthomolecular nutrition.

Animal Necessity® products are all created and certified under FDA Good Manufacturing Practice regulations so they are safe and effective.

Find Peace of Mind:
Look For the NASC Quality Seal.

To display the Quality Seal on their products and marketing materials, NASC member companies must demonstrate stringent ongoing compliance criteria. Learn more at nasc.cc.
